DATE OF INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The plant of the V Molotov Iron Works, National Corporation in Trinec is located north of the town of Trinec on the left side of a double-track railway of the Czechoslovak State Railroads Trinec - Cesky Tesin.
2. From 1950 to 1951 the Czechoslovak Building Enterprises of Pisek were constructing a new plant. The buildings were described under various cover names and for this reason, I am unable to say what was the purpose of the new construction. A hall which was to be used for agglomeration of ore, was still under construction in early 1952 Enclosure (B), Point 15/. It was a steel and brick construction 100 x 80 x 35 meters. The steel was supplied by a plant in Western Germany. At the beginning of 1952 the hall was not yet equipped with machines. Two other new buildings in this group were a mechanical testing hall and a building for new storage space See Enclosure (B), Points 11 and 16/.
3. There was a woodworking plant located outside the main plant, of the iron works between the Trinec - Cesky Tesin state highway and the Olse River. This factory was a part of the V Molotov Iron Works and was a one-story brick (or concrete?) construction in the shape of an "L". The building was divided into several rooms and the floor was made of steel and concrete.
4. A tile factory was under construction also. It was a steel and concrete building 200 x 150 meters, with three aisles. The floor was concrete. It was rumored among the workers employed on the project that this plant would never serve as a tile factory but for some other purpose.
5. A water and filtration station, See Enclosure (B), Points 19-21/ was also being built. Only a canal from the Olse river to the filtration station was finished. The foundation of the station was made of concrete and the rest of the building was brick. The water pumping station itself will be in a 20 x 15 meter brick building.
6. A store-house for raw-material, 200 x 100 m, See Enclosure (B), Point 24/ was being built. only the concrete foundations were finished up to a height of 2.5 meters.
7. An electric power transformer station, See Enclosure (B), Point 17/ was being built. The building was 8 x 8 x 20 meters and had several stories. Electrical equipment had already been installed in the building.
8. A new railway track, See Enclosure (B), Point 6/ had just been started in early 1952. The track will be connected with the main line of the Czechoslovak State

V MOLOTOV IRON WORKS, NATIONAL CORPORATION IN TRINEC WITH ACCOMPANYING LEGEND

1:75000

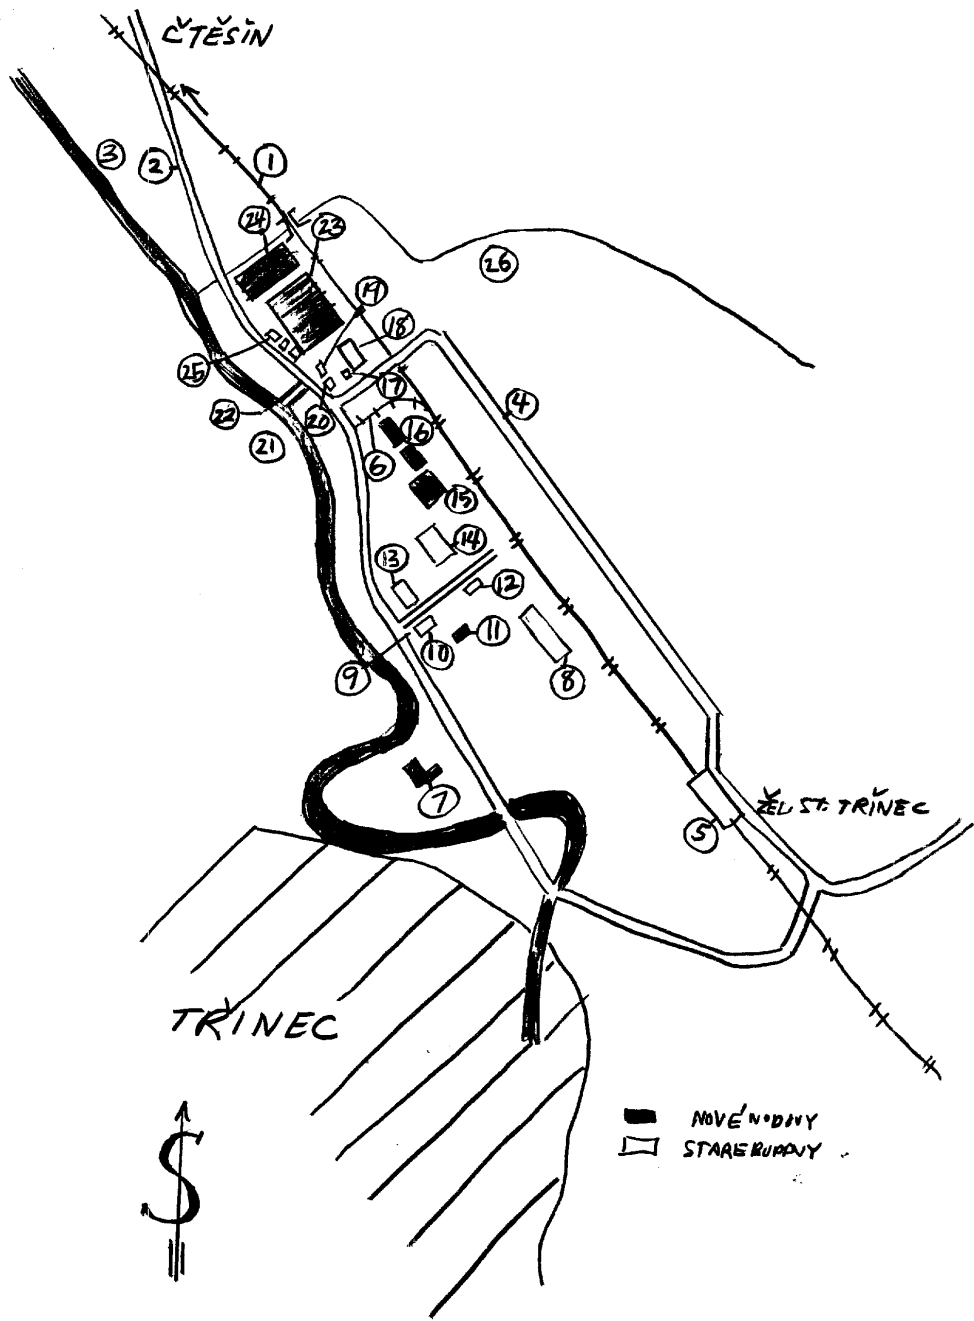

Legend:

- 1... The old plant of the Iron Works in Trinec
- 2... The new (enlarged) plant of the Iron Works in Trinec
- 3... The woodworking plant which belongs to the V Molotov Iron Works, National Corporation in Trinec.

SECRET/SECURITY INFORMATION

Page -1- DIAGRAM OF MOLOTOV IRON WORKS WITH ACCOMPANYING LEGEND SHOWS DETAILED LAYOUT OF THE PLANT

Legend:

- 1... A double-track railway of the Czechoslovak State Railroads Trinec - Cesky Tesin.
- 2... State highway Trinec - Cesky Tesin.
- 3... Olse river
- 4... An asphalt road from the railway station in Trinec to the state highway Trinec - Cesky Tesin. This road connects the new and the old plant of the Trinec Iron Works.
- 5... Railway station in Trinec.
- 6... New Railway track in the V Molotov Plant.
- 7... The newly-built woodworking factory of the V Molotov Plant, one-story "L" shaped building, 90 x 90 x 20 meters.
- 8... Steel rolling mill
- 9... Gatekeeper's lodge and gate No 7.
- 10... Plant hospital
- 11... The new mechanical testing hall, a one-story brick building, 60 x 35 x 8 meters.
- 12... The plant hotel.
- 13... Grey pig-iron foundry.
- 14... Main warehouse of material for the iron works
- 15... A new hall for agglomeration - a steel construction, 100 x 80 x 35 meters.
- 16... Construction of new storage spaces begun early 1952, for iron ore sorted according to various classes - Pyramid-shaped concrete building with individual storerooms for various kinds of ores.
- 17... Construction of an electric power transformer station a brick building, 8 x 8 x 20 meter
- 18... Maintenance workshops of the V Molotov Plant.
- 19... Filter station, a newly-constructed building, 20 x 40 meters.
- 20... Water station, newly built, 20 x 15 meters.
- 21... Concrete water canal, 10 meters wide.
- 22... Construction of a new dam for the filter station where the foundation only was completed
- 23... Construction of the tile factory; a steel and concrete construction 150 x 200 x 15 - 20 meters.
- 24... Construction of a warehouse for raw materials, a steel and concrete construction, 200 x 100 meters. The roof was not completed.
- 25... Wooden houses for the employees of the Czechoslovak Building Enterprises, National Corporation from Pisek, who were employed in the construction work.
- 26... A creek
